Prepared by Alan Surgener  
Consultant to **Measure Up! 2006**  
Country Arts WA

### **GENERAL DESCRIPTION**

One of the premier venues on the western seaboard; this proscenium arch, 318 seat tiered theatre has a performance area of 10 metres wide x 8 metres deep.

Full black wool masking with cyclorama; three onstage lx bars on winches and a FOH lx bar accessible by gantry. The auditorium sightlines are perfect.

There is a surround sound speaker system and the acoustics are good to very good.

There are two fully-equipped dressing rooms with laundry facilities backstage, and the direct to stage load-in is excellent.

*Photo taken while cinema screen onstage*

## TOURING TIPS

The sound and lighting equipment available, although adequate, is minimal. If you are intending on doing something flash, then bring your own.

At the time of this report at the end of 2006 there was no sound loom and only 5 sends available through stage floor dips to the FOH control room. There were no facilities to enable sound mixing from the auditorium, a stage monitoring system works, but the control room is soundproofed.

Two-way headset communication from prompt corner to the control room is available, although the sets are old and needing renewed.
