Rear of building shows loading door

General Description

Originally built as a gym hall in 1983, the proscenium arch theatre was added in 1991 and houses a 900-high stage with a very easy load-in door. There is a single 32-amp three-phase backstage and also one in the centre of the auditorium. Half-length wired lighting bars offer 10-circuits out front. The estimated concert style audience is 400 and the acoustics are, surprisingly, good.

FOH control box; side windows

Proscenium arch; FOH LX; basketball hoop swings up for performances

Touring tips

If you need to blackout, then black plastic the six windows, they are all within reach.

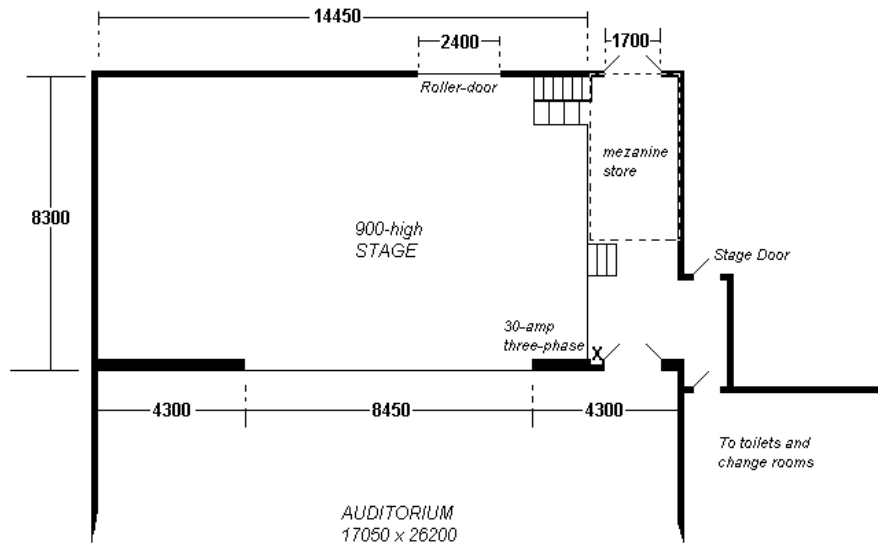

The FOH lighting bars are 5500 off the deck so book the genie from the Shire if you need to rig.

The FOH three-phase power outlet is located up in the raised side control area: this used to be where the footy timekeeper watched the games out on the oval. It makes an interesting follow-spot position.

Dimensions

Stage depth	8300
Stage width	14450
Stage height	900
Stage thrust	380
Stage floor to ceiling	5500
Stage floor to grid	4600
Proscenium width	8450
Proscenium height	3900
Auditorium depth	26200
Auditorium width	17050
Aud floor to ceiling	7100 @ sides
Aud floor to grid	5600

DANDARAGAN HALL - SCALED FLOORPLAN

Flying facilities

Flying system	Fixed grid – no flying
Masking	Standard black box: 3 legs each side French action black tabs cs Fixed black tabs on bar us
Cyclorama	No
