GENERAL DESCRIPTION

Originally built in 1903 this beautifully maintained hall is, in my opinion, the best example of its period in WA. A unique tin fascia proscenium arch, polished jarrah floor and auditorium walls set it above the rest, providing an honest charm and a good reason for preservation.

A tightly packed 200 concert style seating capacity, or an estimated 80 cabaret style, make this an ideal venue for smaller acts or bands.

The stage is small, and the proscenium low, but the acoustics are surprisingly good. Easy load in and centrally located.

TOURING TIPS

There is a 2700 high jarrah walkway on the back wall. This is accessed via steep stairs from the dressing room, and I have absolutely no idea why it is there, and the masking is more of an obstruction than a help.

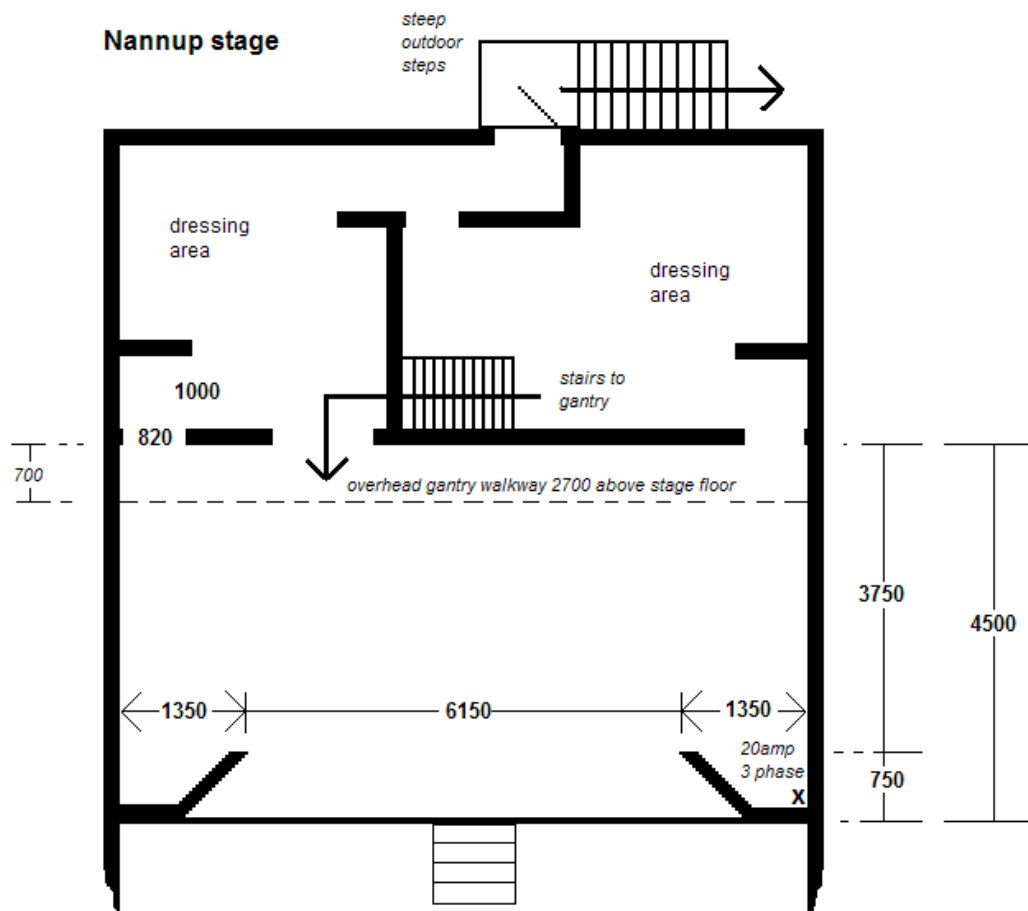

The only 10amp power points in the auditorium are located high up on the side walls and are normally used to start the gas heaters so pull power from the kitchen.

There are no toilets backstage.
