General Description

Built in 1929. Estimated concert style capacity 200. Small proscenium style 900-high raised stage with tabs and masking. Estimated performance area 6000 x 5400. Estimated stage floor to grid 3500. Built in steps at either side of stage lead down to the auditorium. FOH roof support rods provide hanging positions for lights.

There is standard double-door access to both the stage at rear of building, or to the auditorium at street side.
